Course Description

Computer Science/Information Systems 130 is a course in programming, algorithm development and problem-solving using both object-oriented and structured approaches. It includes a study of syntax and data structures with applications in science, engineering, and industry. This course is suitable either for students planning to transfer or those wishing to develop a marketable skill.

Transfer Credit: CSU, UC, USC.

Prerequisites:

CS/IS 112 - Introduction to Programming Using Java

Disabled Students

All students with disabilities requiring accommodations are responsible for making arrangements in a timely manner through the Center for Students with Disabilities.

Attendance

Online attendance is checked by using students' online activities. Students are required to show positive attendance during the entire course.

DON'T GET DROPPED! Students cannot miss more than two weeks' worth of assignments in online classes. Online assignments include at minimum weekly check-in assignments, lab-work and homework programming assignments that are due EOD (end-of-day) Friday and Sunday respectively.

Attendance or participation is never measured by 'logging-in' or time spent in Canvas.

Make-up Policy

There are no make-up examinations, homework, etc. All students are required to take the midterm and final exams in order to pass the class. If a student can't comply with the assignment due dates, the student is required to make arrangements with the instructor one week or more before the assignment date.

Assignments that need to be submitted through Canvas have strict due date policies. Assignments that need to be submitted through HyperGrade also have strict due date policies. All students get a pool of 7 late days through HyperGrade, when they register for the class. These late days can be used to extend assignment due dates without penalty in 24-hour increments. Late days cannot be used for midterm and final examination assignments.

Examinations and Grading

Your final course grade will consist of a composite of the following:

Weekly Check-Ins	5%	Short paragraphs to summarize what you've learned during each week (Canvas)
Lab Programming Assignments	15%	Weekly (shorter or smaller) programming assignments (HyperGrade) due Friday
Homework Programming Assignments	25%	Weekly (longer or larger) programming assignments (HyperGrade) due Sunday
Midterm Exam	12.5%	30 multiple-choice questions exam (Canvas)
Midterm Programming Assignment	12.5%	1 programming assignment to be completed within 24 hours (HyperGrade)
Final Exam	15%	30 multiple-choice questions exam (Canvas)
Final Programming Assignment	15%	1 programming assignment to be completed within 24 hours (HyperGrade)

First Week Drop Policy

This instructor reserves the right to drop no-shows after the first week of the online classes, if no prior arrangements were made for the absence. See above "Attendance" section for details.

Academic Honesty Policy

This instructor follows the Glendale Community College Honesty Policy as listed in the *Glendale Community College Catalog* and the *Student Handbook* (free at Information Desk near Admissions). Students are, at all times, required to do their own work. No copying of other students' work, whether on a test or on routine classwork, is allowed at any time. Activities that are considered to be CHEATING include, but are not limited to, the following:

- Copying a programming assignment from another student and submitting as your own
- Talking, signing, texting, messaging, using any other electronic device, or otherwise communicating with another student during an exam
- Copying or attempting to copy answers to exam questions from another student.

Violation of any of these rules (i.e. cheating) could result in a lowering of the exam grade or the course grade (e.g. a "Fail"), and the violator's name and student I.D. number will be sent, with a description of the violation, to the Division Chair and to the Vice President of Instruction to be kept on record for future reference. The Dean of Student Activities may also be contacted for disciplinary action, if necessary.
